Background

Please enter any background experience you have in ecosystem processes, e.g. biology, environmental science, agriculture, etc:

Physical Capability

EOV monitoring requires working outdoors on farms with the landowner or land manager, and our monitors need the physical capability to conduct this work. Would you agree that you have this ability?

YES NO

Attendance

Attendance at all training sessions is required, however, recordings will be made available on request if that there is an unavoidable absence from one or two sessions. Accreditation as an EOV monitor will require satisfactory participation in training sessions and subsequent field familiarisation and accreditation sessions. Will you be available for these sessions?

YES NO

Availability for Monitoring

The monitoring season picks up in spring and comes to an end in late autumn, and usually involves some travel and often nights away. Should you choose to pursue your EOV Monitor accreditation, are there any restrictions on your availability to conduct monitoring events?

For more information, please contact Emily Whyman, Coordinator EOV Australia:
eov@holisticmanagement.au or 0439 480 534.
